

good afternoon,

I am writing to oppose SB184 & HB5262.
I would like to see bills have stronger and clearer language.

Any bill that would allow by not specifically stating that it doesn't allow for mass mailing application mailing.

We should be writing statute and bills to allow for voter ID. We should be throwing out AB ballots that aren't filled in correctly and not cured by the law. Allowing for mistakes just to allow votes doesn't give faith in the election system and leaves room for fraud that can't be detected.

There need to be proper checks and balances.

Further the propaganda of fear for vivid and public health that the secretary of state and the democrats of this general assembly and our governor leads to manufactured problems in being able to vote that don't exist.

Any expansion of the right to vote should require effort from the voter. Applications requested. Then submitted terrified, followed by then sent out and returned and verified.

The buck-passing from the Secretary of state to town registers of voters and back for data and transparency is disgusting.

Thank you
